ANKIT GHANSHYAM PAREKH

LEAD FRONTEND ENGINEER

PROFILE

Lead Frontend Engineer with 18+ years of frontend and web development experience across Angular, React, TypeScript, JavaScript, Node.js, and enterprise SaaS platforms. Experienced as Team Lead, Front End Lead, Lead Front-end Programmer, and Senior Front-end Developer, with ownership across architecture, delivery, wireframing, API integration, UAT, production support, and team coordination.

Strong target fit: Lead Frontend Engineer, Senior Angular Developer, Frontend Architect, Angular/React/TypeScript Lead, AI Frontend Engineer, and Enterprise UI Architect.

WORK EXPERIENCE

Team Lead

Codifyd Inc., Kandivali, Mumbai Sep 2017 - Present

- Lead frontend delivery for enterprise product data, product experience, and governance platforms covering catalogs, attributes, assets, approvals, validation-heavy workflows, and long-running operations.
- Own architecture decisions for Angular, React, TypeScript, Node.js, and Java-backed product surfaces, balancing scalability, maintainability, product quality, and release speed.
- Guide teams of up to 15 developers across product design, implementation, sprint delivery, code quality, and production sustainment.
- Partner with product, backend engineering, QA, SMEs, and client stakeholders to align requirements, API contracts, UAT, and production defect RCA.

Front End Lead / Front-end Expert

Zooty.in, Andheri, Mumbai Feb 2016 - Sep 2017

- Led frontend delivery for an AngularJS/Angular booking platform and Sass-based dashboard for salon and spa owners.
- Owned UX and implementation for booking flows, dashboard workflows, transaction management, responsive layouts, and active maintenance.
- Coordinated a 5-member team and delivered product features using AngularJS, Angular 2, Node.js, PHP Laravel, SQL, Bootstrap, HTML, CSS3, and JavaScript.

Lead Front-end Programmer

Musafir.com, Andheri, Mumbai Nov 2014 - Dec 2016

- Led frontend implementation for online travel booking surfaces covering hotels, flights, holidays, search, pricing, itinerary, and checkout workflows.
- Built and maintained Backbone.js and Node.js based consumer web features where performance, edge-case handling, and clarity affected booking completion.

CSI workshops and seminars
Yukti certificate, rank 207

ADDITIONAL EXPERIENCE

Senior Front-end Developer

Verdantis Pvt. Ltd., Andheri, Mumbai Sep 2013 - Oct 2014

- Built enterprise UI modules for manufacturing, plant, asset, and product data systems with strict validation and workflow requirements.
- Delivered AngularJS/.NET MVC frontend features for forms, tables, responsive layouts, data-heavy workflows, UAT support, and client-facing issue resolution.

Earlier Frontend / Web Development Roles

Capgemini, Efurtherance, E10 InfoTech, Aambit Softwares, Fourth Dimension Infotech 2011 - 2014

- Delivered HTML, CSS, JavaScript, responsive UI, client project, Scrum, and maintenance work across freelance, part-time, trainee, internship, and web developer roles.

SELECTED PROJECTS

Amaze - Product Experience Platform | React, Node.js, Java

- Enterprise PXM platform covering product content creation, merchandising design, attribution design, digital asset management, syndication, and advanced intelligence.
- Led a 15-member developer team and contributed architecture direction across product design, implementation, scalability, and end-to-end delivery. [ADD METRIC IF AVAILABLE]

Bridge - Product Data Platform | Angular, Node.js, Java

- Enterprise product data platform covering product content, attribution, assets, syndication, approval flows, and workflow-heavy operations.
- Led and architected frontend delivery for a 5-member team over a multi-year engagement, improving maintainability and delivery consistency. [ADD METRIC IF AVAILABLE]

AI Employee Force / Angular AI Copilot Platform | Angular, TypeScript, Node/NestJS-style architecture

- Building an AI frontend platform direction for enterprise internal tools, including agent marketplace, Codex-style session UI, collapsible sidebar, agent workspace, browser/testing panel, streaming/SSE response UI, and tool execution UX.
- Positioned as frontend/product engineering for AI-powered workflows, not machine learning research: the focus is usable, observable, and maintainable copilot interfaces.

Musafir.com and Zooty - Booking Platforms | Backbone.js, AngularJS, Angular, Node.js

- Delivered travel booking, salon/spa booking, business dashboard, transaction, search, pricing, itinerary, checkout, and responsive product workflows.

FOCUS AREAS

Angular and React frontend leadership | Enterprise SaaS | UI architecture | Component systems | API-driven workflows | PIM/PXM product platforms | AI frontend and copilot UX | Product engineering | Remote-ready collaboration
